Summary

Junior Full Stack Web Developer I have experience in planning to build a website and how to define the needs of the project in the user interface such as Frontend and also building its needs on the server side such as database design and API building.

Training / Courses

Aon — It continued for 3 months for full-stack web applications. After graduation, there was a certificate documenting the training

Hackathon From ASWAR Company — It was a challenge that lasted for 7 days to build a website that included IOT. There were creative programming solutions and they were worked diligently. We also obtained a certificate and documented work with it.
